

## PURPOSE

- Discover the principles of Lean and de-mystify the perceptions around this global improvement methodology.
- Understand the different concepts and tools and how to use them in order to start improvement projects at the end of the workshop.
- Build a clear plan (roadmap) for implementing Continuous Improvement in a Production and / or Service industry.
- Foster the motivation to actively contribute to the implementation of Lean and integrate the “people” aspect in the roadmap.

# Implementing Lean & Continuous Improvement

STANDARD AGENDA (Most agenda's are adapted to your specific situation)

- The principles and concepts behind Lean and continuous improvement.
- A practical game to discover all the aspects of Lean: the purpose of Lean, Root Cause Analysis, DMAIC, Team work, etc.
- The critical success factors for implementing Lean or continuous improvement in an organization.
- Building a clear roadmap for year 1, 2 and 3 at company or organization level.
- Learning the basic and essential tools for starting the first Lean projects.
- Avoiding to build a useless structure for implementing lean within the organization.
